HAZWOPER Train-the-Trainer

40.0 Hours
4.0 CEUs

This state-of-the-art course will cover in detail the regulatory and training requirements of the Hazardous Waste Operation and Emergency Response (29 CFR 1910.120) standard. OSHA states that a measure of the competence of an instructor is the successful completion of a train-the-trainer program with training and experience specific to the topics they will teach. Not only does the course review the various elements of the HAZWOPER standard, but there are also demonstrations as well as hands-on practical simulations to meet the experiential requirements of the regulation. The course is offered both online and as an instructor-led live course; please check our course calendar for our upcoming classes!

Confined Space Entry & Rescue Program Manager

40.0 Hours
4.0 CEUs

This intensive, hands-on course aboard the Battleship USS North Carolina uses adult training methodologies to provide students with an understanding of confined spaces and the permitting process. The course focuses on assessing confined space hazards and the appropriate means of elimination. This action-packed course consists of four days of intensive, hands-on exercises which include multiple evolutions of entering confined spaces, victim packaging, and rescue. This course meets NFPA 1006 and 1670 Technician level, ANSI Z117.1, and OSHA 1910.146 standards and response guidelines. The course is only offered as an in-person class; please check our course calendar for our upcoming classes!

Available In-person Only

\$2495.00

Live course includes lunch M-F and snacks daily,
course material, certificate, and wallet card.

Professional Development Courses

Safety Director Certificate

121.0 Hours/12.1 CEUs

In today's hectic workplace, safety professionals are tasked with a variety of day-to-day health and safety responsibilities. The Safety Director Certificate (SDC) curriculum provides an in-depth look at the standards safety professionals encounter each day and offers a solid foundation of knowledge for students to apply to the safety challenges they may face. Earning the SDC indicates a level of proficiency expected of a safety professional capable of developing and managing a comprehensive facility-wide or corporate safety program.

*** Qualifying Credential for CSD Certification!**

Certificate Courses

Safety Auditor Certificate

24.0 Hours/ 2.4 CEUs

There is no more important skill to the safety professional than the ability to discover and remedy hazards before they can injure workers. This is the purpose of the workplace safety auditor and their three primary tools: Hazard Analysis, Inspections, and Accident Investigation. This course teaches the purpose of workplace safety audits and provides insight on how to discover the circumstances, situations, equipment, or materials that may harm an employee.

Available Online Only
\$795.00

Premium Member Price
\$695.00

Environmental Health & Safety Professional Certificate

24.0 Hours/ 2.4 CEUs

Understanding the quagmire of OSHA, EPA, DOT, and other applicable regulations can be an overwhelming task. This course is designed for the busy professional who desires to improve his or her knowledge and credentials but has little time for classroom training. The Environmental Health & Safety Professional Certificate course clarifies your responsibilities in workplace safety and environmental protection and ensures that you have both the “know how” and the resources to meet those responsibilities.

Available Online Only
\$995.00

Premium Member Price
\$895.00

ADA Compliance Certificate

16.0 Hours/1.6 CEUs

The ADA Compliance Certificate course provides in-depth guidance on the ADA accessibility standards so that students of this course are properly equipped to inspect, assess, and make improvements to your facility to prevent future ADA litigation. This course also discusses the rise of drive-by and surf-by ADA lawsuits and provides case studies with which to better understand precedent-setting case law.

Available Online Only \$595.00

Premium Member Price \$495.00

H₂S Train-the-Trainer

16.0 Hours/1.6 CEUs

The Hydrogen Sulfide (H₂S) Train-the-Trainer course provides the student with critical knowledge surrounding all aspects of hydrogen sulfide and the delivery of H₂S training. This course meets the ANSI/ASSP Z390.1-2017 standard and includes modules on various applicable H₂S standards, including ANSI Z490.1, OSHA, OPITO, Texas Statewide Rule 36, and H₂S Alive.

Available Online Only \$795.00

Premium Member Price \$695.00

Human Organizational Performance Certificate

12.0 Hours/1.2 CEUs

The Human and Organizational Performance (HOP) Certificate course focuses on using social sciences to better understand and respond to mistakes in the workplace. This approach explains how these errors are often connected to other processes or the environment, outlines that human error can never be completely eliminated, and demonstrates how to more effectively respond to them.

Available Online Only \$395.00

- Environmental Safety Specialist
- Hazardous Waste Management
- Spill Containment
- HAZMAT Emergency Response Awareness
- HAZMAT Emergency Response Operations Level
- HAZMAT Emergency Response Incident Commander
- HAZMAT Emergency Response Refresher

Additional Services

Site-Specific Training

We will send qualified and experience trainers into your facility and provide the training required by OSHA, all relevant best practices, and the specific needs of your employees. Our training methodology is world renowned for its ability to captivate trainees and ensure maximum retention of the material covered. Typically, this may be more cost-effective than sending employees to an open-enrollment course if you have ten (10) or more employees.

LMS Course Development

Are you tired of assigning the same stale safety courses on your companies' Learning Management System (LMS)? Do you feel as though employee engagement is suffering from bland training? That is where NASP can lend a hand. We understand that each companies' needs vary greatly, and no two companies are alike. For this reason, we have worked to ensure that NASP delivers a fully customizable course, tailor-made to fit your exact safety-related training needs.
